Contents

1   Nurture Community

Nurture Community is a platform for needy people and connects with the restaurants providing free food if they have additional food left. In this way, Nurture Community helps needy people to get away with their hunger and solves the food wastage problem faced by restaurants. This application is capable of meeting customer requirements for reliability, responsiveness, and agility.

The Nurture Community platform provides our users to connect with restaurants which post food as well as order, track and pickup food.

4   Restaurant Lists

- After successful login, a list of all the restaurants available will be available.
- In the search bar the enter the zip code and all the restaurants for that zip code will be shown.

- The page will be updated, and new data will be available when the restaurant representative register with restaurant details.

5 Add Items

The restaurants can post food items so that the users can view them from their end and can redeem to food details.

To add food items, the restaurants needs to enter following details:

- **Item name**: Name of the Item
- **Item Description**: Few details about the item they are posting like if its vegan or some ingredients.
- **Upload a Picture**: Need to upload the photo of the item if that is available
- **Quantity of the food**: The Quantity of the food items so the user can see how many is left.
- **Choose whether the food needs to pick from the restaurant location**: In this if restaurant selects "Yes", then the address which they entered while registering will be used for pickup. If the restaurant Owner selects "No", form will ask to fill a new address from where the food needs to be picked. The details asked will be:

a. **Address Line 1**

b. **Address Line 2**

c. **City**

d. **Province**

e. **Country**

- **Pick Up Time**: Select the time when the food needs to be picked.

After entering all the details and submitting, the user can see these items on the dashboard for the login. At the dashboard, the food items can be edited and deleted if required.

6 Update / Delete Food Items

The food items are being displayed on the restaurant's dashboard. If the restaurants wants to update the food items, he can click on the pencil icon ✎ to edit the quantity of the food items that are available and click on the bin icon 🗑 to delete the food item by the restaurant under the actions section.
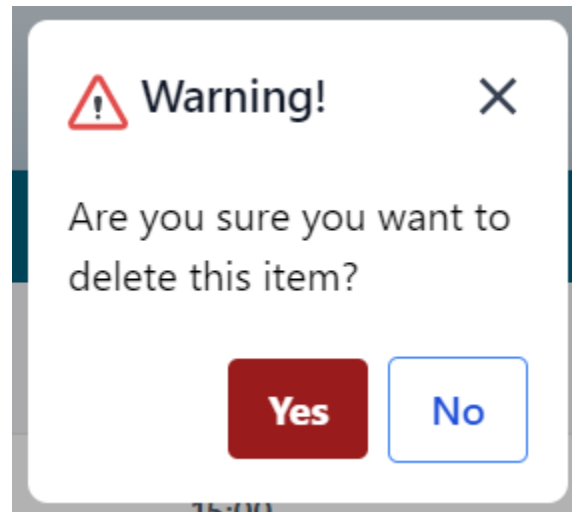

ITEM NAME ↑↓	PICKUP INFO	QUANTITY ↑↓	ACTIONS
Beef Burger Double patty beef burger with cheese	17:00	1	✎ 🗑
Chicken Burger Chicken patty, cheese, pickles	15:00	6	✎ 🗑

Once the restaurant owner clicks on the edit or pencil icon, it shows a pop saying "Enter the updated quantity below" as seen in the image. The user can type the new quantity and click on update. The new updated quantity will be shown on the dashboard as well as to the users who want to redeem the food items.

If the restaurant clicks on the bin icon / delete button to delete the food item. A pop warning will

be showed which confirming that you really want to delete this item with Yes and No option.

Clicking on Yes will delete the item and will be removed from the dashboard.
